REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: the combination of elements as claimed is deemed to be directed to an unobvious improvement over the invention patented by Eskildsen. Eskildsen discloses a hydraulic control arrangement comprising a valve block including first and further directional control valves (e.g. 26, 126) connected to first and second hydraulic consumers (e.g. 24, 124), respectively; a load sensing regulating valve (17) acted on by a control pressure (11, via 15), dependent on a highest load pressure of the consumers; wherein the load pressure is generated by a changeover valve (e.g. 30), connected to respective first (29) and further (129) line segments; a pilot valve arrangement (13) which limits the control pressure to a predetermined value. This improvement comprises that the pilot valve arrangement can change the predetermined value from a high first limit to a lower second limit, based on a defined pressure occurring in the further line segment.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, preferably **accompanies** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
